Issues Identified & Fixed

- **Hardcoded credentials** → Replaced with environment variables and config template

- **Old job processing** → Added filter to process jobs posted within last 6 hours

- **Unreliable AI scoring** → Redesigned prompt with strict scoring and priority rules

- **Airtable priority errors** → Enforced exact enum values (High/Medium/Low)

- **Missing budget context** → Extracted budget and included it in AI scoring

- **No alerts for good jobs** → Added Slack alerts for High-priority jobs

---

Sample Scored Jobs

Job Title	Score	Priority	Reasoning
n8n CRM Automation	8	High	Direct n8n match, strong budget
AI Chatbot (Twilio)	9	High	AI + automation, good hourly rate
SaaS API Integration	5	Medium	Relevant but unclear scope
Email Automation (Zapier)	5	Medium	Transferable skills
WordPress Website	2	Low	No automation relevance

Suggested Future Improvements

- Duplicate job detection using job IDs

- Budget-based pre-filtering to reduce AI cost

- Email alerts as Slack alternative

- Retry logic and error logging

- Auto-generated proposals using AI

- Analytics dashboard for ROI tracking
